MATERNAL INITIATIVE AFRICA

“Connecting Nurses. Reaching Mothers. Transforming Africa.”

What is Maternal Initiative Africa?

Maternal Initiative Africa is a nurse-led platform committed to ensuring that mothers and children, especially those living in underserved and hard-to-reach communities, can access health education, support, referrals, and connections to appropriate healthcare services.

Our 5 Core Services

1. TELEHEALTH – Digital Health Support

Connecting mothers with nurses and midwives through digital platforms for health advice, health education, follow-up, and referral support.

2. COMMUNITY OUTREACH – Reaching Mothers Where They Are

Nurses and midwives engage with communities and rural areas to provide health education, awareness, support, and connections to healthcare services.

3. DATA & RESEARCH – Turning Challenges into Evidence

Collecting real community-level data to identify existing gaps and generate evidence that can guide solutions, partnerships, and funding.

4. EDUCATION – Sharing Knowledge That Saves Lives

Providing training, health education, and awareness for mothers, families, communities, nurses, and midwives.

5. AFRICA NURSES NETWORK – Building Strength Together

Connecting nurses, midwives, researchers, organizations, and partners across Africa to collaborate on research, outreach, education, and innovation.

Our Approach

TECHNOLOGY	We use technology to reach mothers.
NURSES	We use nurses to provide support.
OUTREACH	We use community outreach to reach underserved communities.
DATA	We use data to understand gaps and guide solutions.
NETWORK	We use our network to build collaborative African solutions.

OUR MISSION

No mother should be left behind because of distance, lack of information, or lack of access to care.

For Anyone Joining the Platform
By joining Maternal Initiative Africa, you become part of a nurse-led African platform focused on connecting healthcare professionals, communities, knowledge, technology, data, and practical solutions to improve maternal and child health across Africa.
